tectovault

AI agents that work for your business.

Brand guide — logo, colours, typography, voice and ready-to-use copy.
Version 1 · November 2026.

01 · WHO WE ARE

One line, everywhere

AI agents that work for your business.

Agjentë AI që punojnë për biznesin tuaj.

TectoVault builds AI agents that answer customers, book appointments and handle repetitive work for businesses in Albania — and the automation and software they run on.

Use exactly this tagline on the website, social profiles, ads, proposals, invoices and email signatures. Retired lines — don't use them any more: “Optimize. Automate. Operate.” and “Building the intelligent business.”

02 · LOGO

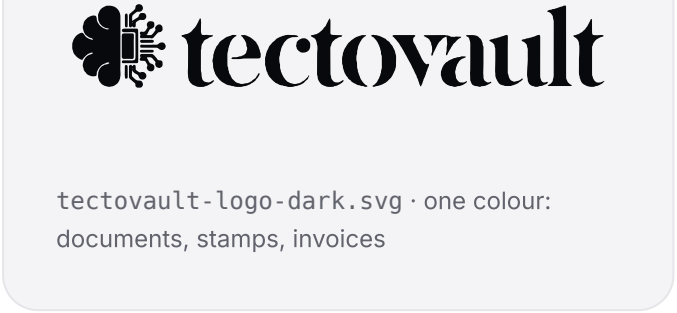

Logo files

`tectovault-logo.svg` · full colour, on white or very light backgrounds

`tectovault-logo-white.svg` · on ink, photos and dark backgrounds

`tectovault-logo-dark.svg` · one colour: documents, stamps, invoices

`tectovault-mark.svg` · icon only: avatars, favicons, app icons

Rules

Do

- Keep clear space around the logo equal to the height of the letter “o”.
- Minimum size: 120 px wide on screens, 30 mm in print. Below that, use the icon only.
- Use the white logo on dark backgrounds and photos.

Don’t

- Stretch, rotate, outline or add shadows or glows to the logo.
- Recolour it outside the palette below, or retype the wordmark in another font.
- Put the full-colour logo on mid-tone or busy backgrounds.

The SVG files were traced from the website's 696 × 147 px logo and are sharp at any screen size. For large-format print (signage, vehicles), ask the original designer for the master vector file.

03 · COLOUR

Palette

Teal
#2F8F72 · rgb 47 143 114
Primary accent on light backgrounds: buttons, links, highlights.

Mint
#4FD1A8 · rgb 79 209 168
Accent on dark backgrounds and for glows.

Ink
#08090C · rgb 8 9 12
Dark sections, headlines on light, the logo in one colour.

White
#FFFFFF
Main light background.

Mist
#F4F4F6
Alternate light sections, cards, text on ink.

Slate
#62636C
Secondary text on light backgrounds.

Ash
#9A9BA3
Secondary text on dark backgrounds.

Logo gradient
#5F9584 → #C3D2CD
Only inside the logo wordmark.

Rule of thumb: mostly ink and white, with teal (or mint on dark) used sparingly for what should be clicked or noticed. Red #E5484D is for errors only.

04 · TYPOGRAPHY

Two typefaces

Headings · Manrope · 500–600 · tight letter-spacing (−2%)

Meet the agents that never clock out.

Body · Inter · 400–500 · 16–18 px on screens

Each agent learns your business — services, prices, policies and tone — and connects to your systems, so it gets things done instead of just chatting.

Both are free (Google Fonts / Fontsource). Small labels: Inter 600, uppercase, wide letter-spacing (+20%), in teal. Where the fonts aren't available (Word, email), use Arial.

05 · VOICE

How we write

Clear

Short sentences and everyday words. Say what the agent does: “books appointments”, not “leverages AI to optimise engagement”.

Practical

Lead with the customer's problem (missed calls, messages at night) and the concrete result.

Honest

No invented numbers, clients or guarantees. Examples are labelled as examples. Say what an agent can't do.

WRITE	AVOID
AI agent / agjent AI	chatbot, bot, robot (except when comparing)
TectoVault (in text)	Tectovault, TECTOVAULT, Tecto Vault — the logo is lowercase, text is not
Vault — the name of our own website agent	using “Vault” for the company
“answers every message in seconds”	“revolutionary”, “game-changing”, “100% automated”
Albanian first for local clients; English and Italian for tourism and export	mixing languages in one sentence

06 · READY-TO-USE COPY

Copy & paste

Social bio (Instagram, ~150 characters)

🇬🇧 AI agents that work for your business. Chat, voice & WhatsApp agents that answer customers and book appointments 24/7. Tirana 🇦🇱
🇦🇱 Agjentë AI që punojnë për biznesin tuaj. Agjentë chat, zanorë & WhatsApp që u përgjigjen klientëve dhe rezervojnë takime 24/7. Tiranë

LinkedIn — about

TectoVault builds AI agents that work for your business: chat, voice and WhatsApp agents that answer customers, book appointments and handle repetitive work around the clock, in Albanian, English and Italian. We also build the automation, web applications and software they run on. Based in Tirana, Albania.
